Accessing Your Video Files and Links

Inside your Document Center are links to your videos, your project downloads, the Online Video Player embedment code, and QR code.

Your Project Downloads:

8 entries ▾

Your Video Links

Video links are direct shortcuts to your videos. You can share these links in emails or link to them on your website. The videos shown on this page are embedded on our online video player.

Video QR Code

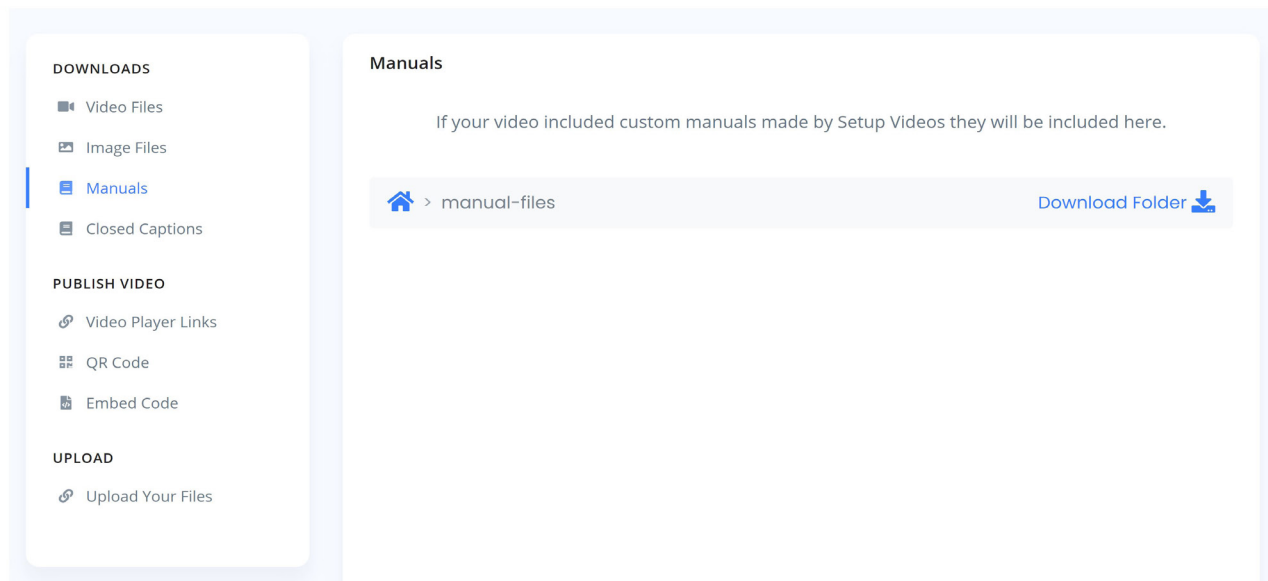

Your QR codes enable customers to access your video directly using the camera app on their smart phone. QR codes can be modified to point directly to your video or optionally to any website address you choose.

Video Embed Code

Your video embed code allows you to easily embed your video on your website without the hassle of having using video host. The embedded player allows you the ability to have shortcuts for each step of your video and optionally to display closed captions in additional languages.

Downloading Your Files

Selecting the Downloads button will bring you to the file downloads for your project.

Below is an overview of the files you receive with your project.

4K Video Files:

- All of your videos are available to download in several formats for use on YouTube, Amazon, and other websites. Additional formats are available upon request.

Photorealistic Image Renderings:

- These are images of your product that are produced with transparent backgrounds that are perfect for marketing, websites, brochures and presentations.

Project Files:

- Your video also include extras like quick QR code and embeddable online video player code

Upload Documentation Here:

- In this area you can upload files like your latest assembly manual that we use to create your video, images, CAD Files, or any other files you think can help with the video process.
